The data came from NBA.com
(http://stats.nba.com/leadersGrid.html?PerMode=Totals&sortField=PTS&Season=2013-14&SeasonType=Regular%20Season&Scope=S&StatCategory=PTS&ls=iref%3Anba%3Agnav&pageNo=1&rowsPerPage=100)

The data is about the top 60 players in points section. There are a bunch of variables, but we're going to pick first 7 variables which are GP(game played), MIN(minutes), PTS(points), FGM(field goal made), FGA(field goal attempted, FG%(field goal percentage), and 3FGM(3points field goal made).

The meaning of rows is the name of top 60 nba players in point section and 7 variables that I just talked about above are going to be the observations.
